

How Nsites Helps Your Church — and How It Can Generate Money

Two things every church leader wants to know: does this help us lead better, and does it help us financially? Nsites answers both. Stewardship Nsites gives leadership Fortune 50—caliber clarity on giving, attendance and finances. PowerPlay Payments (P³) processes the payments the church already receives — lowering cost of acceptance and generating support for students and community.

1. STEWARDSHIP NSITES — LEAD WITH CLARITY, NOT GUESSWORK

Built by a CPA/CMA/MBA who spent a career turning data into decisions for Fortune 50 and private equity companies, reworked for the way churches actually operate.

- Giving and contribution trends — who gives, how often, and what is changing.
- Membership, attendance and engagement patterns in one executive view.
- Financial performance, cash flow and budget vs. actual clarity.
- Ministry and program performance — what is growing, what needs attention.
- Forecasting and early-warning alerts on risks and opportunities.
- Simple executive dashboards for the pastor, board and finance team.

2. POWERPLAY PAYMENTS (P³) — THE SAME PAYMENTS, BETTER ECONOMICS

The church already accepts tithes, offerings, event registrations, tuition and program payments. PowerPlay Payments processes them — in person, online, by payment link, on mobile including Tap to Pay on iPhone, and on a recurring schedule — with competitive, transparent processing economics.

- Fast onboarding and fast funding.
- Affordable — lower total cost of acceptance.
- Convenient — every channel members already use.
- Transparent — statements you can actually reconcile.
- Secure — encryption and tokenization by default.
- Connected — payment data flows into Stewardship Nsites.

3. DOES IT MAKE MONEY? HERE IS HOW

01 Keep more of what already comes in.

Lower processing cost on giving and event revenue means more of every dollar stays inside the ministry — without asking members for anything additional.

02 Turn payment activity into community giving.

As payments flow through the PowerPlay ecosystem, revenue is generated — and a designated portion of Nsites' own transaction economics funds a customized community giving program for the church. It is never a surcharge to the church or its members.

03 Fund students in your community.

Giving is directed to college tuition and education support, scholarships and local community organizations — with structure, beneficiaries and reporting customized with each church.

04 Grow the impact with participation.

The more churches, schools and community organizations that participate, the larger the pool — and the more students the network can put through college.

The pledge behind it

The mission is to help put under-resourced students through college, starting with churches near HBCUs and colleges. Everyday payment activity becomes an ongoing, growing source of scholarship support — measured and reported back to the church.

— PROGRAM OVERVIEW — HOW IT WORKS FOR A CHURCH

Step 1 Discovery call (30 minutes).

We look at current giving platforms, processing statements and reporting pain points.

Step 2 Platform walkthrough.

Leadership sees Stewardship Nsites on real church-style data — dashboards, trends and forecasts.

Step 3 Payments review and proposal.

Side-by-side processing economics, a customized community giving structure, and an implementation plan.

Step 4 Onboarding.

Acceptance goes live, historical data is loaded, dashboards are configured for the pastor, board and finance team.

Step 5 Ongoing reporting.

Quarterly insight reviews plus community-impact reporting the church can share with its congregation.

— WHAT TO TELL A PASTOR IN ONE SENTENCE

“Nsites shows us exactly what is happening with our giving, attendance and finances — and by moving our payments to PowerPlay we lower what we pay to process them and generate scholarship support for kids in our own community, at no additional cost to our members.”

Illustrative and directional. Final processing pricing is subject to merchant underwriting, card mix and contractual terms. Community giving is generated from Nsites' own transaction economics — never as an additional surcharge to the participating organization — and each program is structured individually.

Make the Power Move.
