

# Nsites PowerPlay Payments

BANKING PARTNER OVERVIEW

nsites.tech · allan@nsites.tech

The Power Move in Payments · Payments connected to intelligence

## POSITIONING

Most payment processors stop at the transaction. PowerPlay Payments by Nsites connects card, online, mobile and recurring acceptance directly to analytics, reporting and action — giving merchants transaction intelligence alongside the payment itself. For a banking partner, that means stickier merchant relationships, richer portfolio data and a differentiated acceptance offering.

## THE FACTS ADVANTAGE

|                    |                                                                                  |
|--------------------|----------------------------------------------------------------------------------|
| <b>Fast</b>        | Rapid onboarding, quick funding and reporting that keeps pace with the business. |
| <b>Affordable</b>  | Competitive processing economics engineered to lower total cost of acceptance.   |
| <b>Convenient</b>  | Card, online, mobile, recurring and payment links — every channel customers use. |
| <b>Transparent</b> | Clear statements, settlement detail and analytics that reconcile.                |
| <b>Secure</b>      | Encryption, tokenization and compliance-minded architecture by default.          |

## TAP TO PAY ON IPHONE

Merchants accept all types of in-person contactless payments directly on iPhone — physical debit and credit cards, Apple Pay and other digital wallets — with no additional hardware. Delivered through a certified integration, it removes payment development complexity and turns every device into an acceptance point.

- › No card readers to buy, deploy or maintain
- › Counter, curbside, field service, events and pop-ups
- › Built-in iPhone security and privacy features
- › Card numbers not stored on device or Apple servers
- › Photo, video and screen recording blocked at payment
- › Faster expansion into new locations and use cases

## CAPABILITIES

- › Credit / debit card processing
- › Online and card-not-present payments
- › Recurring payments and billing
- › Payment links
- › Mobile and contactless acceptance
- › Transaction and settlement reporting
- › Payment analytics and revenue dashboards
- › Integrated payments into existing systems

## PAYMENTS TO INTELLIGENCE
